

TACF Chapter Science Agreement

Revised October 20, 1995

- I. The state chapter will support research efforts which will contribute to the state chapter's work and is consistent with TACF's mission and goal of restoring the American chestnut tree.
- II. State chapters will not take a position contrary to the national organization's mission.
- III. Prior to the inception of all long-term science and research projects, approval must be received from the Science Cabinet of TACF.
- IV. All science and research projects will be reported to the national TACF Science Cabinet. This cabinet will maintain a national file of all research being done by the chapters and will communicate this to all chapters for mutual information and cooperative relationships.
